

JOHN C. BROWNING, MD, FAAD, FAAP

MARY K. RAMIREZ, MD, FAAD

CAROLYN A. ROBINSON, DO, FAAD

GREGORY I. KELTS, MD, FACS

Excellent opportunity to join an established dermatology practice in San Antonio, TX, the seventh largest city in the United States with over 2,000 new residents every month. You will have the opportunity to care for a wide range of patients with both common and rare diagnoses, with access to the latest and greatest cutting-edge treatment modalities. Texas Dermatology serves over 180,000 patients at 5 locations across the greater San Antonio and surrounding areas; from North and South San Antonio, to the under-represented areas of Boerne, New Braunfels, and Kenedy Texas.

Our Mission Statement:

At Texas Dermatology we seek to deliver the highest quality of skincare to multiple generations of Texans. We aim to provide a team-oriented and productive work environment. We strive to be a responsible corporate citizen and contributing member of the community through education, research, and service.

Dr. Browning's Experience and Education:

Dr. Browning is president and founder of Texas Dermatology, a dermatology clinic, medical spa, and research center with over 16 providers and 5 locations, including 4 Board Certified Dermatologists, 1 Plastic Surgeon, 11 Physician Assistants, and 4 medical estheticians. Dr. Browning obtained his undergraduate degree from Vanderbilt University, magna cum laude, and his medical degree from the University of Texas Medical Branch in Galveston, Texas, where he graduated with honors. He completed residencies in pediatrics and dermatology at Baylor College of Medicine, where he was chief resident of dermatology. Browning completed a fellowship in pediatric dermatology at Texas Children's Hospital before returning to his native city of San Antonio. He was a faculty member at UT Health San Antonio before starting his private practice in 2013. He continues to serve and educate as adjunct associate professor at UT Health San Antonio, teaching pediatric and dermatology residents from UT Health and the United States Military training program.

Quality & Outcomes:

The team at Texas Dermatology, remains abreast of the latest advancements and research findings for medical dermatology, so patients can feel confident that they will receive the best possible solution for their dermatological concerns. Texas Dermatology proudly offers clinical research trials to advance the field of dermatology and provide our patients with access to cutting-edge devices, treatments, and medications. Our work in research not only benefits patients around the world, but also enhances the outcomes for families in San Antonio, New Braunfels, Kenedy, and other areas of Texas. Our clinical research department serves to keep Texas Dermatology at the forefront of healthcare innovation and excellence. Due to his unique expertise, Dr. Browning and his team are often the last hope for patients with complex and rare dermatologic conditions, for example, we treat several pediatric patients diagnosed with epidermolysis bullosa, a chronic genetic skin condition characterized by skin fragility and easy blistering. Browning usually meets these children in the newborn nursery, where he has the unfortunate charge of explaining their condition to their families. Some people refer to epidermolysis bullosa as the worst condition you've never heard of. Nonetheless, Texas Dermatology is proud to have long-term relationships with these children and their families as we help them navigate some of the challenges associated with the condition.

Unique Procedures:

Texas Dermatology offers the following unique procedures:

- Superficial Radiation Therapy (SRT) - a painless approach to treating nonmelanoma skin cancers and keloid scars
- Light therapy including Excimer Laser, UVB Phototherapy and Photodynamic Therapy

Availability & Accessibility:

We offer same-week appointments, as well as telemedicine visits for established patients through our patient portal. Dr. Browning and his team are bilingual in English and Spanish. We are well versed in drug formularies across all insurance plans, which makes it easier for patients to obtain their medications in a timely fashion. Each location is fully staffed with experienced dermatologists, physician assistants, and clinical support staff, as well as professional administrative staff. Staff and provider communication are available via email, patient portal (mobile and web), and via text.

Philanthropic work:

Texas Dermatology places great value in giving back to the community we serve. Dr. Browning offers free clinics twice a month to the indigent and underserved members of the San Antonio community at Travis Park in the heart of Downtown San Antonio. He also volunteers to train pediatric residents at the University of Texas Medical Branch. Dr. Browning has also volunteered at Camp Dermadillo, a barrier-free camp that works in partnership with not-for-profit organizations to enrich the lives of children with chronic skin disease. Additionally, Texas Dermatology donates to many organizations/entities including Morgan's Wonderland, San Antonio Food Bank, and the Witte Museum.
